## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,3,4 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Richardson (U.S. Patent Number 4,898,004). Richardson discloses an in-store refrigerated display system. Referring to Figs.1-3, the system comprises a display unit 40, a refrigeration base unit 20 and a door with plastic hinge 45. Richardson also discloses the refrigeration unit can be a thermoelectric device (col.7, lines 23-24). Under the principals of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. When the prior art device is the same as a device described in the specification for carrying out the claimed method, it can be assumed the device will inherently perform the claimed process. *Ir re King*, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

3. Claims 1,2,3,12 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Umezawa (JP2000028248).

Umezawa discloses a storage/display chamber as shown in the figures. The storage/display chamber comprises a heat insulation casing 2, a display chamber 3, thermoelectric module 8, a blower 19 and a fan 22. The display cover 24 is transparent. Under

the principals of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Umezawa (JP2000028248).

In regard to claims 4-11, the structure arrangement, attachment and capacity are design choice and are not patentable.
